Regarding: IDIS Products and Solutions Are Not Affected by PHP2Shell Vulnerabilities

IDIS would like to provide the following information regarding the impact of the recently disclosed PHP2Shell vulnerabilities (CVE-2026-109618 and CVE-2026-109619) on IDIS products and solutions.

None of IDIS's products or solutions use PHP. This includes all IDIS products, such as IP cameras and NVRs, as well as officially provided solutions, including IDIS Solution Suite (VMS), IDIS Center, WebGuard, FEN, and Push.

Accordingly, IDIS products and solutions are not affected by these PHP2Shell vulnerabilities, and no firmware or software updates are required to address them.

This notice applies to IDIS products and solutions. For any third-party systems that are operated separately or integrate with IDIS products, please contact the respective vendors to confirm directly if systems are affected.

If you have any questions, please contact your local IDIS technical support representative.
