

AI in the BOX

Operation Manual

DV-1304-A

Before reading this manual

This operation manual contains basic instructions on installing and using DirectIP AI in the Box, an IDIS product. Users who are using this product for the first time, as well as users with experience using comparable products, must read this operation manual carefully before use and heed to the warnings and precautions contained herein while using the product. Safety warnings and precautions contained in this operation manual are intended to promote proper use of the product and thereby prevent accidents and property damage and must be followed at all times. Once you have read this operation manual, keep it at an easily accessible location for future reference.

- ☒
- The manufacturer will not be held responsible for any product damage resulting from the use of unauthorized parts and accessories or from the user's failure to comply with the instructions contained in this operation manual.
 - It is recommended that first-time users of this network camera and individuals who are not familiar with its use seek technical assistance from their retailer regarding product installation and use.
 - If you need to disassemble the product for functionality expansion or repair purposes, you must contact your retailer and seek professional assistance.
 - Both retailers and users should be aware that this product has been certified as being electromagnetically compatible for commercial use. If you have sold or purchased this product unintentionally, please replace with a consumer version.

Safety Precautions

	CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN	
CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.		

- 
- The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.
- 
- The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Safety Precautions

Important Safeguards

1. Read Instructions All the safety and operating instructions should be read before the appliance is operated.

2. Retain Instructions The safety and operating instructions should be retained for future reference.

3. Cleaning Unplug this equipment from the wall outlet before cleaning it. Do not use liquid aerosol cleaners. Use a damp soft cloth for cleaning.

4. Attachments Never add any attachments and/or equipment without the approval of the manufacturer as such additions may result in the risk of fire, electric shock or other personal injury.

5. Water and/or Moisture Do not use this equipment near water or in contact with water.

6. Ventilation Place this equipment only in an upright position. This equipment has an open-frame Switching Mode Power Supply (SMPS), which can cause a fire or electric shock if anything is inserted through the ventilation holes on the side of the equipment.

7. Accessories Do not place this equipment on an wall or ceiling that is not strong enough to sustain the camera. The equipment may fall, causing serious injury to a child or adult, and serious damage to the equipment. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturer.

This equipment and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the equipment and cart combination to overturn.

8. Power Sources This equipment should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power, please consult your equipment dealer or local power company. You may want to install a UPS (Uninterruptible Power Supply) system for safe operation in order to prevent damage caused by an unexpected power stoppage. Any questions concerning UPS, consult your UPS retailer.

9. Power Cord Operator or installer must remove power and TNT connections before handling the equipment.

10. Lightning For added protection for this equipment during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the equipment due to lightning and power-line surges. If thunder or lightning is common where the equipment is installed, use a surge protection device.

11. Overloading Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.

12. Objects and Liquids Never push objects of any kind through openings of this equipment as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the equipment.

13. Servicing Do not attempt to service this equipment yourself. Refer all servicing to qualified service personnel.

14. Damage requiring Service

Unplug this equipment from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- A. When the power-supply cord or the plug has been damaged.
- B. If liquid is spilled, or objects have hit the equipment.
- C. If the equipment has been exposed to rain or water.
- D. If the equipment does not operate normally by following the operating instructions, adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the equipment to its normal operation.
- E. If the equipment has been dropped, or the cabinet damaged.
- F. When the equipment exhibits a distinct change in performance — this indicates a need for service.

15. Replacement Parts

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

16. Safety Check

Upon completion of any service or repairs to this equipment, ask the service technician to perform safety checks to determine that the equipment is in proper operating condition.

17. Field Installation

This installation should be made by a qualified service person and should conform to all local codes.

18. Correct Batteries

Warning: Risk of explosion if battery is replaced by an incorrect type. Replace only with the same or equivalent type. Dispose of used batteries according to the instructions. The battery shall not be exposed to excessive heat such as sunshine, fire or the like.

19. Tmra

A manufacturer's maximum recommended ambient temperature (Tmra) for the equipment must be specified so that the customer and installer may determine a suitable maximum operating environment for the equipment.

20. Elevated Operating Ambient Temperature

If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the manufacturer's maximum rated ambient temperature (Tmra).

21. Reduced Air Flow

Installation of the equipment in the rack should be such that the amount of airflow required for safe operation of the equipment is not compromised.

22. Mechanical Loading

Mounting of the equipment in the rack should be such that a hazardous condition is not caused by uneven mechanical loading.

23. Circuit Overloading

Consideration should be given to connection of the equipment to supply circuit and the effect that overloading of circuits might have on over current protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.

24. Reliable Earthing (Grounding)

Reliable grounding of rack mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g., use of power strips).

In-Text

Symbol	Type	Description
	Caution	Important information concerning a specific function.
	Note	Useful information concerning a specific function.

User's Caution Statement

Caution: Any changes or modifications to the equipment not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

FCC Compliance Statement

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE, IN WHICH CASE USERS WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT THEIR OWN EXPENSE.

WARNING: CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT. THIS CLASS OF DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE CAUSING EQUIPMENT REGULATIONS.

WEEE (Waste Electrical & Electronic Equipment)

Correct Disposal of This Product

(Applicable in the European Union and other European countries with separate collection systems)

This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

Part 1 – Introduction

Product Features

This AI in the Box (Artificial Intelligent in the Box) analyzes the live video from DirectIP cameras and transmits the video over Ethernet connections. This product offers the following features:

- Video Inputs : 4-channel H.264 and H.265 IP camera
 - DirectIP protocol supported
 - Convenient firmware upgrades via network
 - Firmware duplication and auto recovery functions to enhance system stability
 - Various image analysis function such as Object Detection, Intrusion, Loitering, Line Crossing, Face Detection and Crowd Detection.
 - Object Detection: Detects an object (human, vehicle) in the zone set by the user.
 - Intrusion: Detects an object (human, vehicle) entering or leaving the zone in the direction set by the direction options (In, Out, In/Out)
 - Loitering: Detects an object (human, vehicle) that stays longer than the set time.
 - Line Crossing: Detects an object (human, vehicle) which crosses a pre-defined line in the direction set by the direction options (In, Out, In/Out)
 - Face Detection: Detects a human face in the the zone set by the user.
 - Crowd Detection: Detects an event when the number of people in a defined area exceeds a set number.
-  The Crowd Detection function is only supported on specific NVR models.
- Configuraton of device settings and integrated management of multiple AI Boxes on the NVR (Network Video Recorder)

Check the following before connecting the product. (Only for the examples 1,2,3)

- Check if the Switch's PoE power per port supports 30W.

Example 1 : Connection Diagram Using PoE Switch

Example2 : Connection Diagram Using PoE Switch

Example 3 : Connection Diagram Using PoE Switch

- ☒ Check the following before connecting the product. (Only for the example 4)
- Check if the NVR's PoE power per port supports 30W.

Example 4 : Connection Diagram without PoE Switch

Types of Cables	
	LAN Cable (Data + PoE Power)

Example 5 : Sonnection Diagram without PoE Switch

Types of Cables

LAN Cable (Data + PoE Power)

Accessories

Upon unpacking the product, check the contents inside to ensure that all the following contents are included.

- All in the Box
- User Guide and Instruction Manual (This document)
- Rubber Foot (4EA)

Overview

Front Panel

1	Power LED	2	Network LED	3	Factory Reset Switch
---	-----------	---	-------------	---	----------------------

① Power LED

Displays system operating status

② Network LED

Displays network connection status

LED Status Indications

LED	Status	Description
Power LED	Off	No power connection
	Blinking	System booting or upgrading
	On	System operating
Network LED	On / Blinking	Normal network connection

③ Factory Reset Switch

Use to return all settings to the original factory settings. Connect the power and poke a straightened paperclip into the factory reset switch hole. Hold the reset switch until the VA Box’s internal buzzer sounds twice. Release the reset switch, and all of the device settings are now at the original settings it had when it left the factory.

- **Factory Reset during system booting:** All of the AI Box's settings are now at the original settings it had when it left the factory.
- **Factory Reset during system operating:** The other settings except for system log are now at the original settings it had when it left the factory.
- **Factory Reset via the IDIS Discovery program:** The other settings except for system log and network settings are now at the original settings it had when it left the factory.
- **Factory Reset via the IDIS Discovery program(including network settings) :** The other settings except for system log are now at the original settings it had when it left the factory.

Rear Panel

① Network + PoE Power In

Connect a Cat5e cable with an RJ-45 jack. The device is capable of connecting to networks via an Ethernet connector and also receives power (PoE) from the NVR.

② Camera + PoE Power Output

Connect a network camera. PoE power of network camera is available only when DC48V is supplied.

This product supports a camera with PoE-af (15.4 W) and a network bandwidth of 100 Mbps and does not support connecting multiple IP cameras.

③ DC48V Input

Connect the two wires of the power adapter to these ports. Be careful not to cross the DC48V and GND wires. Booting will commence once connected to a power supply.

- ✓ • The network connector is not designed to be connected directly with cable or wire intended for outdoor use.
- ⚠ • Organize the power cable so that it will not cause people to trip over or become damaged from chairs, cabinets, desks, and other objects in the vicinity. Do not run the power cable underneath a rug or carpet.
- Do not connect multiple devices to a single power outlet.
- Please wire within 3m(118") indoors for stable power supply when installing the adapter.

Stream Setting Guide for AI Box Camera

System Requirements

- **Resolution:** 640x360 to 1920x1080
 - **IPS:** 6 or higher
 - **Amount of Data** - 640x360 @ 10ips ~ 30ips
 - 1280x720 @ 10ips ~ 15ips
 - 1920x1080 @ 10ips
- ☒ • One of the three streams must match the above conditions.
- How to calculate the amount of data : Resolution (horizontal x vertical) x ips
- **Minimum Requirement**
 - **Resolution:** 640x360
 - **IPS:** 6
 - **Recommended Setting**
 - **Resolution:** 640x360
 - **IPS:** 15 or higher
- ☒ • If the minimum requirements are not satisfied, analytical performance will be reduced.
- If the amount of data exceeds the maximum setting, the analysis will stop.

Network Setup (Alias IP)

- 1 Launch the IDIS Discovery program and then select the AI in the BOX(DV-1304-A) from the main screen whose settings you wish to change.

- 2 Click on the Setup  icon.

- 3 Select the IP Address Setup from the Setup menu to load the Alias IP setting screen. Alternatively, you can select DV-1304-A from the main screen and then right-click to access the Alias IP setting screen.

- ☒ • Configure this setting before registering on NVR.
- ☒ • It supports DHCP and Manual IP settings

Part 2 - Camera Installation

Camera Installation Guide for IDLA (IDIS Deep Learning Analytics) Features

In order for the camera and, in effect, various AI functions to operate properly, the following must be applied.

Horizontal Angel

The image should be level with the horizon. The camera should be tilted no more than 30° from the horizontal.

Object Size

To reduce the risk of missed detections, the minimum height for humans and vehicles is at least 6% of the total image height based on resolution criteria.

☒ In the IDIS Center program, navigate to Menu > View > Pixel Counter.

Object Visibility

Position cameras so that they can capture the entire object, such as people and vehicles in the image, rather than just a partial view.

We recommend installing cameras diagonally to prevent objects from overlapping each other. (In crowded scenarios, frequent overlap can impact detection accuracy.)

Face Detection

To reduce the risk of missed detections, the person's face is at least 4% of the total image height based on resolution criteria.

In the IDIS Center program, navigate to Menu > View > Pixel Counter.

1) Mount cameras to capture the entire face in the image and position them at the average height of a person for a good angle on faces.

2) Mount the camera so that person in the image is front-facing and is not looking down or up. Face detection feature recognizes within 60 degrees from horizontal and 30 degrees from vertical.

Fisheye View

Persons and vehicles must be installed at a height of at least 6% of the image height.

Fisheye lenses can produce distortion, especially near the edges of the image, which can reduce recognition accuracy.

IDLA (IDIS Deep Learning Analytics) Configuration Guide

Zone Detection

To detect an object, the user-defined detection point for the object must be within the detection zone. In the case of humans, the point is at the feet, while for vehicles, the detection point is at the bottom.

Line Crossing Detection

Detection occurs when the user-defined detection point for the object crosses the line.

(Line Crossing position is set to center (Center of object) by default, but you can modify it according to the installation environment in the settings)

[Pre-event]

[Post-event]

Recommended Crossing Position Settings

- When the line is vertical, we recommend using the default setting.
- If the line is horizontal and the object passes through the area below the line too quickly compared to the area above the line, it is recommended to set the detection position to **Lower side of object**. Conversely, in the opposite scenario, setting it to **Upper side of object** of object is recommended.

Analysis Conditions

Position it in the center to capture both the before and after moments of passing the virtual line or zone.

Wrong Examples

Postures Other Than Upright Position

Humans should move in a somewhat upright position.

Insufficient Dissimilarity Between Objects and the Background

There should be sufficient dissimilarity between objects and the background to distinguish the object from the background or other objects. Fog, direct light shining on the camera, or an excessive noisy image can cause contrast issues. You can adjust the level of illumination and adjust the image settings to enhance the level of contrast.

When Obstacles such as Trees, Walls, or Fences Partially Obstruct the Object

When a Person Is Nearly Obscured by a Parked Vehicle

Conditions That Can Trigger False Alarms

Environments

- Fog
- Heavy rain or snowfall
- Insects on the camera lens
- If water droplets form on the camera lens

Environments

- Inadequate brightness or light
- Overly noisy image
- Direct light shining on the camera
- If the position of the camera differs from the direction of a light source and it makes a shadow.
- If an object is reflected on the floor, wall, glass, metal or water
- Strong light causing shadows.
- If the mirror is reflecting light
- A combination of car headlights and intense rain

Other Conditions

- When several extremely fast moving objects appear randomly
- Human-size animals.
- When an object is located at the edge of a fisheye image
- When an object is located at the end of a corridor in a corridor (1x3) format view
- For Face Detection and Crowd Detection functions, detection accuracy may decrease when using fisheye cameras.

Part 3 - VA in the Box Setting via NVR

<Before You Configure VA settings>

Configure basic VA Box settings and all other system settings.

- Screen images may vary depending on the model.
- When using the camera with Intelligent Codec, it could delay the image analysis up to 10 seconds.

- When the MAT (Motion Adaptive Transmission) function is active, the image analysis may not work properly.
- It is recommended that you do not use the MAT function of the associated camera to increase the accuracy of the image analysis.

Camera Protocol

VA Box supports **DirectIP** protocol.

- **DirectIP** protocol:
 - Using with a DirectIP NVR enables VA Box use without the need to configure network settings.
 - The DirectIP NVR also allows you to control all VA Box settings directly from the NVR, without the need for a computer.
- For more information on configuring VA Box settings from a DirectIP NVR, refer to the **Part 3 - VA in the Box Setting via NVR on page 29**.

Firmware Upgrade

Refer to the **Firmware Upgrade on page 29** to perform a firmware upgrade.

VA Box Setup

Select **Device Setup-VA Box** from the setup menu. Login with an ID that has permission to access the setup menu is needed to access and make changes to the Setup menu.

- 1 While in Live mode, press the remote control's **SETUP** button or select Live menu > Setup using the mouse.

- 2 Use the remote control's arrow buttons to select an option and then press the remote control's  button or left-click on the option using the mouse.

VA Box

By analyzing camera images, you can check real-time analysis results from a client program such as the IDIS Center.

VA Box can only analyze the video from the camera using H.264 and H.265.

VA Box_Registration

You can register VA Box at remote locales.

- **Title:** Edit the VA Box's name.
- **MAC Address:** Displays the VA Box's MAC address registered to the NVR.
- **Address:** Displays the VA Box's IP address registered to the NVR.
- **Model:** Indicates the VA Box's model.
- **Scan:** Select to scan and register the device connected to the NVR.

Device Scan

Scan the device under **VA Box- Registration - Scan.**

- **No.:** Select the number of the registered VA Box and click the **Add Box** button to register the camera.
- **MAC Address:** Displays the scanned device's MAC address.
- **Address:** Displays the scanned device's IP address.
- **Model:** Indicates the device model.
- **Registered Device MAC Address:** Displays the MAC address of the NVR to have registered VA Box.
- **Status:** "Registered" indicates the VA Box is registered to the NVR and "Not registered" indicates the VA Box is not registered to the NVR.

VA Box_Setup

Configure VA Box-related settings.

No.	Title	Model	Camera	Analytic Type	Configuration	Reset
1	VA BOX1	DV-1304	8. CAM8	People Counting > 1		Reset
2	VA BOX2	DV-1304	8. CAM8	HeatMap		
3	VA BOX3	DV-1304	8. CAM8	Social Distancing Violation		
4	VA BOX4	DV-1304	8. CAM8	Mask Rule Violation		
5	VA BOX5	DV-1304-A	10. CAM10	Object Detection		Reset
6	VA BOX6	DV-1304-A	10. CAM10	Intrusion		
7	VA BOX7	DV-1304-A	10. CAM10	Loitering		
8	VA BOX8	DV-1304-A	10. CAM10	Line Crossing		
9	VA BOX9	None	None	None		
10	VA BOX10	None	None	None		
11	VA BOX11	None	None	None		
12	VA BOX12	None	None	None		
13	VA BOX13	None	None	None		
14	VA BOX14	None	None	None		
15	VA BOX15	None	None	None		
16	VA BOX16	None	None	None		

- **Title:** Displays the name of a VA Box.
- **Model:** Indicates the VA Box's model.
 - ☒ The video analytics may not be supported depending on the model.
- **Camera:** Select the camera to analyze the video. Only one camera can be set for each VA Box channel.
- **Set up:** The settings appear differently depending on the Analytic Type. Refer to the setting items for each Analytic Type
- **Reset:** Resets the port or VA Box.
 - **PoE Reset:** Control the PoE Switch's port. This option is available when connecting to Video In/ PoE port or using a DirectIP PoE Switch (optional). Select PoE Reset to reboot VA Box.
 - **Soft Reset:** Reboots VA Box.
 - ☒ Use a client program such as IDIS Center to check the analysis results.
- **Analytic Type:**
 - **DV-1304 :** Select one among People Counting, Vehicle Counting, HeatMap, Social Distancing Violation, Mask Rule Violation and Queue Monitoring.
 - **DV-1304-A :** Select one among Object Detection, Intrusion, Loitering, Line Crossing and Face Detection.

<Types of Video Analytics >

Object Detection

Object Detection technology detects an object (human, vehicle) in the zone set by the user.

Drag and drop the vertex to modify a previously set zone or click on the left mouse button to reset the zone.

Right-click on the zone setup screen to bring up the Object Detection Menu.

- **Configuration :** Set the environment of Object Detection. Select Object Detection as the video analysis type, and then select Settings.

- **Motionless Object Filter :** Detect a specific fixed object in an indoor space. However, it is recommended to use this setting only in environments with minimal movement, and it is not recommended when Loitering events are enabled.
- **Threshold :** Set a reference value that can be recognized as an object in the image.

Intrusion

Set direction options (In, Out, In/Out) to detect an object (human, vehicle) entering or leaving the zone.
 Drag and drop the vertex to modify a previously set zone or click on the left mouse button to reset the zone.

Right-click on the zone setup screen to bring up the Intrusion Menu.

- **Configuration** : Set the environment of Intrusion.
 Select Intrusion as the video analysis type, and then select Settings.

- **Motionless Object Filter** : Detect a specific fixed object in an indoor space. However, it is recommended to use this setting only in environments with minimal movement, and it is not recommended when Loitering events are enabled.
- **Threshold** : Set a reference value that can be recognized as an object in the image.

Loitering

Loitering detection technology detects an object (human, vehicle) that stays longer than the set time.
 Drag and drop the vertex to modify a previously set zone or click on the left mouse button to reset the zone.

Right-click on the zone setup screen to bring up the Loitering Menu.

- **Configuration** : Set the environment of Loitering .
 Select Loitering as the video analysis type, and then select Settings.

- **Motionless Object Filter** : Detect a specific fixed object in an indoor space. However, it is recommended to use this setting only in environments with minimal movement, and it is not recommended when Loitering events are enabled.
- **Threshold** : Set a reference value that can be recognized as an object in the image.

Line Crossing

Set direction options (In, Out, In/Out) to detect an object (human, vehicle) which crosses a pre-defined line. Click on the left mouse button to reset the line.

Right-click on the line setup screen to bring up the Line Crossing Menu.

- **Configuration** : Set the environment of Line Crossing. Select Line Crossing as the video analysis type, and then select Settings.

- **Motionless Object Filter** : Detect a specific fixed object in an indoor space. However, it is recommended to use this setting only in environments with minimal movement, and it is not recommended when Loitering events are enabled.
- **Threshold** : Set a reference value that can be recognized as an object in the image.

Face Detection

Face Detection technology analyzes faces in an image. Drag and drop the vertex to modify a previously set zone or click on the left mouse button to reset the zone

Right-click on the zone setup screen to bring up the Face Detection Menu.

- **Configuration** : Set the environment of Face Detection. Select Face Detection as the video analysis type, and then select Settings.

- **Motionless Object Filter** : Detect a specific fixed object in an indoor space. However, it is recommended to use this setting only in environments with minimal movement, and it is not recommended when Loitering events are enabled.
- **Threshold** : Set a reference value that can be recognized as an object in the image.

VA Box_Schedule

Configure the schedule of the VA Box. Select the + button on the bottom left of the screen to add a schedule. Select Day to specify the Day setting or select All. Select Scope to specify the time frame.

[illegible]

- ✓ Deleting the schedules stops the real-time video analysis.

VA Box_Maintenance

When using NetFS, select Firmware Upgrade. You can select USB storage or NetFS. If not using NetFS, you can select USB storage only. Select USB storage to display USB search window and then select the corresponding upgrade package from the storage device connected to the NVR's USB port. After selecting an upgrade package, select Apply to upgrade the VA Box.

Device	No.	Product	Version	Firmware Upgrade	X

	14				X
	15				X
	16				X

Upgrade

- The VA Box will reboot after the upgrade and then reconnect automatically.

Part 4 - Configuring IDLA Events via NVR

IDLA Event Setup

Select **Event** Setup - **IDLA** from the setup menu.
Login with an ID that has permission to access the setup menu is needed to access and make changes to the

- 1 While in Live mode, press the remote control's **SETUP** button or select Live menu > Setup using the mouse.

- 2 Use the remote control's arrow buttons to select an option and then press the remote control's  button or left-click on the option using the mouse.

IDLA (IDIS Deep Learning Analytics)

This is a list of events that occur during AI video analysis.

IDLA_Setup

IDLA events can be added via the IDLA settings. However, the event must be enabled in the camera's video analytics engine.

- **Event:** Displays the type of the added event.
- **Settings:** Configure conditions to ignore events when they occur, and set PTZ AI tracking and tracking areas.
- **Actions:** Specify which actions to take when the function is detected.
 - **Record:** Specify which cameras to begin linked recording on when an event occurs. If the schedule is set to **Event** or **Time & Event** mode, the selected cameras will begin linked recording when an event occurs.
 - **Alarm-Out:** Designate event-triggered alarm-out channels (each for the NVR and camera) and beeps.
 - **Notify:** Configure to be notified of events by Mail, LAN1 through 5, Push, FTP, and/or Alert Window.
 - **PTZ:** Moves the PTZ camera to a specific preset position when an event occurs.
- **Event Monitoring:** Selects the cameras to monitor when an event occurs.

- In order to use the Callback feature, the NVR must be registered on the remote program.
- When the analytic type is set to Object Detection in the **Device - VA Box- Setup** tab, **Use Ignoring Time** option is not displayed on the screen.
- The PTZ AI tracking function is displayed only on AI PTZ cameras - Setup.
- To use the IDLA function, you need to set up a time-lapse or pre-event recording schedule in advance. Otherwise, the video may not be displayed when searching the event log.

Object Detection

Select the + button at the bottom left of the IDLA Setup window to add an object detection event.

In the IDLA_Setup window, select the box under the Settings column to configure the object detection event.

- **Settings:** When an event occurs, set the conditions to ignore the event and whether to use PTZ AI Tracking.

- **Zone Setup:** Set a zone to be detected as a polygon.

You can set a zone using the mouse. The zone is displayed in transparent. Drag and drop the vertex to modify the zone.

Right-click on the zone setup screen to bring up the Object Detection Menu.

- **Zone Title:** Select the zone to change the settings. When selecting the zone, a check mark appears to the left.
- **Clear:** Clear the selected zone.
- **Undo:** Remove the last point of a line.
- **Edit Name:** Change the name of the zone.
- **Object:** Select an object to detect.
- **Add:** Add a zone.
- **Delete:** Delete the selected zone.
- **Delete All:** Delete all zones.
- **Mode:** Display the modes supported by the camera.
- **Preset:** Select an AI PTZ camera preset.
- **Save:** Save the changes and exit the menu.
- **Cancel :** Exit the setup screen without saving the changes.

Modes and preset functions are supported only by AI PTZ cameras.

- **Ignoring Interval:** The system does not produce event log entries or issue remote notifications regarding event for the specified time after the initial event was detected. Set the value between 1 sec and 5 secs or choose Never. **Ignore Condition** does not affect Object Detection recording.
- **Use Ignoring Time:** The object detection function will be disabled during the specified time.
- **PTZ AI Tracking:** Enable PTZ AI tracking function.

Intrusion

Select the + button at the bottom left of the IDLA Setup window to add an intrusion event.

In the IDLA_Setup window, select the box under the Settings column to configure the intrusion event.

- **Settings** When an event occurs, set the conditions to ignore the event and whether to use PTZ AI Tracking.

- **Zone Setup:** Set a zone to be detected as a polygon.

You can set a zone using the mouse. The zone is displayed in transparent. Drag and drop the vertex to modify the zone.

Right-click on the zone setup screen to bring up the Intrusion Menu.

- **Zone Title:** Select the zone to change the settings. When selecting the zone, a check mark appears to the left.
- **Clear:** Clear the selected zone.
- **Undo:** Remove the last point of a line.
- **Edit Name:** Change the name of the zone.
- **Object:** Select an object to detect.
- **Direction:** Select the direction of the object to detect.

- **Add:** Add a zone.
- **Delete:** Delete the selected zone.
- **Delete All:** Delete all zones.
- **Mode:** Display the modes supported by the camera.
- **Preset:** Select an AI PTZ camera preset.
- **Save:** Save the changes and exit the menu.
- **Cancel :** Exit the setup screen without saving the changes.

☒ Modes and preset functions are supported only by AI PTZ cameras.

- **Ignoring Interval:** The system does not produce event log entries or issue remote notifications regarding event for the specified time after the initial event was detected. Set the value between 1 sec and 5 secs or choose Never. **Ignore Condition** does not affect Intrusion recording.
- **Use Ignoring Time:** The intrusion function will be disabled during the specified time.
- **PTZ AI Tracking:** Enable PTZ AI tracking function.

Loitering

Select the + button at the bottom left of the IDLA Setup window to add a loitering event.

In the IDLA_Setup window, select the box under the Settings column to configure the loitering event.

- **Settings:** When an event occurs, set the conditions to ignore the event and whether to use PTZ AI Tracking.

- **Zone Setup:** Set a zone to be detected as a polygon.

You can set a zone using the mouse. The zone is displayed in transparent. Drag and drop the vertex to modify the zone.

Right-click on the zone setup screen to bring up the Intrusion Menu.

- **Zone Title:** Select the zone to change the settings. When selecting the zone, a check mark appears to the left.
- **Clear:** Clear the selected zone.
- **Undo:** Remove the last point of a line.
- **Edit Name:** Change the name of the zone.
- **Object:** Select an object to detect.

- **Activation Time:** Set the time when the function is activated.
- **Add:** Add a zone.
- **Delete:** Delete the selected zone.
- **Delete All:** Delete all zones.
- **Mode:** Display the modes supported by the camera.
- **Preset:** Select an AI PTZ camera preset.
- **Save:** Save the changes and exit the menu.
- **Cancel :** Exit the setup screen without saving the changes.

- Modes and preset functions are supported only by AI PTZ cameras.
- The activation time may vary depending on the product.
- **Ignoring Interval:** The system does not produce event log entries or issue remote notifications regarding event for the specified time after the initial event was detected. Set the value between 1 sec and 5 secs or choose Never. **Ignore Condition** does not affect Loitering recording.
- **Use Ignoring Time:** The loitering function will be disabled during the specified time.
- **PTZ AI Tracking:** Enable PTZ AI tracking function.

Line Crossing

Select the + button at the bottom left of the IDLA Setup window to add a line crossing event.

In the IDLA_Setup window, select the box under the Settings column to configure the line crossing event.

- **Settings** When an event occurs, set the conditions to ignore the event and whether to use PTZ AI Tracking.

- **Line Setup:** Set a line to be detected.

You can set the line using the mouse. The line is displayed in transparent.

Right-click on the line setup screen to bring up the Intrusion Menu.

- **Line Title:** Select the line to change the settings. When selecting the line, a check mark appears to the left.
- **Clear:** Clear the selected line.
- **Edit Name:** Change the name of the line.
- **Object:** Select an object to detect.
- **Direction:** Select the direction of the object to detect.
- **Crossing Position Settings:** Set the crossing position of the object.
- **Add:** Add a line.
- **Delete:** Delete the selected line.
- **Delete All:** Delete all lines.
- **Mode:** Display the modes supported by the camera.
- **Preset:** Select an AI PTZ camera preset.
- **Save:** Save the changes and exit the menu.
- **Cancel:** Exit the setup screen without saving the changes.

Modes and preset functions are supported only by AI PTZ cameras.

- **Ignoring Interval:** The system does not produce event log entries or issue remote notifications regarding event for the specified time after the

initial event was detected. Set the value between 1 sec and 5 secs or choose Never. **Ignore Condition** does not affect Line Crossing recording.

- **Use Ignoring Time:** The line crossing function will be disabled during the specified time.
- **PTZ AI Tracking:** Enable PTZ AI tracking function.

Face Detection

Select the + button at the bottom left of the IDLA Setup window to add a face detection event.

Click the Settings tab in the IDLA Setup window to configure the face detection event.

- **Settings** When an event occurs, set the conditions to ignore the event and whether to use PTZ AI Tracking.

- **Zone Setup:** Set the zone to be detected as a polygon.

You can set a zone using the mouse. The zone is displayed in transparent. Drag and drop the vertex to modify the zone.

Right-click on the zone setup screen to bring up the Intrusion Menu.

Part 4 - Configuring IDLA Events via NVR

- **Zone Title:** Select the zone to change the settings. When selecting the zone, a check mark appears to the left.
- **Clear:** Clear the selected zone.
- **Undo:** Remove the last point of a line.
- **Edit Name:** Change the name of the zone.
- **Add:** Add a zone.
- **Delete:** Delete the selected zone.
- **Delete All:** Delete all zones.
- **Mode:** Display the modes supported by the camera.
- **Preset:** Select an AI PTZ camera preset.
- **Save:** Save the changes and exit the menu.
- **Cancel :** Exit the setup screen without saving the changes.

Modes and preset functions are supported only by AI PTZ cameras.

- **Ignoring Interval:** The system does not produce event log entries or issue remote notifications regarding event for the specified time after the initial event was detected. Set the value between 1 sec and 5 secs or choose Never. **Ignore Condition** does not affect Face Detection recording.
- **Use Ignoring Time:** The face detection function will be disabled during the specified time.
- **PTZ AI Tracking:** Enable PTZ AI tracking function.

Crowd Detection

Select the + button at the bottom left of the IDLA Setup window to add a crowd detection event.

In the IDLA_Setup window, select the box under the Settings column to configure the crowd detection event.

- **Settings:** When an event occurs, set the conditions to ignore the event.

- **Zone Setup:** Set the zone to be detected as a polygon.

You can set a zone using the mouse. The zone is displayed in transparent. Drag and drop the vertex to modify the zone.

Right-click on the zone setup screen to bring up the Crowd Detection Menu.

- **Clear:** Clear the selected zone.
- **Undo:** Remove the last point of a line.
- **Max People:** Sets the maximum number of people allowed within the area. An event is triggered if this number is exceeded.
- **Min. Dwell Time:** Sets the minimum amount of time people must stay in the area to be detected as a crowd.
- **Add:** Add a zone.
- **Delete:** Delete the selected zone.
- **Delete All:** Delete all zones.
- **Save:** Save the changes and exit the menu.
- **Cancel :** Exit the setup screen without saving the changes.
- **Use Ignoring Time:** The crowd detection function will be disabled during the specified time.

Part 5 - Appendix

Troubleshooting

Problem	Check
Power LED will not turn on	• Check the LAN cable. • Check that the power cable is connected or the NVR has power.
The system is unable to recognize network interface	• Check the LAN cable. • Check the network LED.

Specifications

Model		DV-1304-A
Video	Input	4ch IP
	Compression	H.264 / H.265
Input/ Output	Ethernet	PoE In/Out Port : 10 Mbps / 100Mbps
	DC48V Input	Terminal Blocks
	LED	Power(Status), Network
	Button/Switch	Reset
Environmental Conditions	Operating Temperature	32°F to 104°F (0°C ~ 40°C)
	Operating Humidity	0% ~ 90%
General	Dimensions (W x H x D)	200mm x 44mm x 157.6mm (7.9" x 1.7" x 6.2")
	Unit Weight	0.88kg (1.94 lb)
	Power Supply	48V $\overline{\text{---}}$, PoE
	Power Input	ADAPTOR (INPUT : 100-240V~, 50/60Hz, 1.2A, OUTPUT : 48V $\overline{\text{---}}$, 1.0A)
	Power Consumption	48V $\overline{\text{---}}$, 0.8A, 38.4W PoE, IEEE 802.3at(Class 4), 25W DC OUTPUT : 48V $\overline{\text{---}}$, 0.35A MAX
	Approval	KC, FCC, CE
